To Primary and Specialty Care Physicians:

Who Needs an EIDM Account

Clinicians who:

- will be submitting data directly to CMS (CMS attestation portal);
- have secured an EHR/Health IT Vendor to submit their data to CMS, other than a CMS-approved Qualified Clinical Data Registry or Qualified Registry;
- would like to view how CMS will make payment adjustments.

If you wish to utilize the CMS attestation portal for your IA and/or ACI MIPS reporting please use your Enterprise Identity Management (EIDM) credentials to [sign in to the Quality Payment Program](#).

IMPORTANT: EHR/Health IT Vendors must request this role for **each** group or individual practitioner for whom they are submitting data (one request per TIN). Please note that these groups and/or individual practitioners must have an EIDM account with the appropriate Provider Approver role to approve the EHR/Health IT Vendor role request.

If you do not have an EIDM account:

- Navigate to <https://portal.cms.gov/> and select the “**New User Registration**” link.
- For step by step instructions click here (start at page 13): [Creating an EIDM user account](#)

For questions or problems signing into the Quality Payment Program:

- Email the Quality Payment Program Service Center at QPP@cms.hhs.gov
- Call 1-866-288-8292; TTY: 1-877-715-6222
- To learn more about QPP: [Fact Sheet](#)

For any additional questions contact Lisa Tshonas, ICP, at 860-972-7143 or lisa.tshonas@hhchealth.org
